Arts and Communications

The world is your oyster, as they say. Don't limit yourself; think big. Studies in multicultural and interpersonal communication, small group communication, and public speaking are just a few of the courses that can help you contribute locally—or globally—in a meaningful way.

Basic Education for Adults

No matter what your educational background is, a better future is within your reach. Programs in high school completion, transitioning to a job, learning English, and college prep are designed to help you get you where you want to go. You'll feel welcomed, supported, and safe on our campus.

Business

Whether you're thinking about a small business start-up, or aspire to run a large corporation, many of the same skills apply to any business. SVC's Business programs will help you create a foundation of skills that support success in today's fast-paced, ever-changing business world.

Education

Everyone recalls a favorite teacher who made a difference in their lives. If you're inspired to work with children and their families, you can be that special instructor. Our Education programs can get you on your way to a rewarding career.

Food and Beverage Management

For hundreds of years, people have been eating and drinking at restaurants and bars. While a lot of things have changed over the years, one thing has stayed the same: developing skills in this field gives you the potential to live and work where you like - anywhere in the world.

Health Sciences

You care about people and want to see them enjoying life to the fullest. The Health Sciences field offers numerous ways to explore rewarding careers in patient care and a variety of support functions. Will your journey of caring start today?

Industrial Technology & Transportation

Cars, trucks, boats, factories ... many industries would grind to a halt without the people who keep these machines moving. Machines are a big part of what makes America go. Are you ready to roll up your sleeves?

Public Service & Social Science

Serving the public is a mission for many people. Firefighters, social workers, and police officers all work for change in their communities. If you're drawn to make a difference, SVC can help you find your path.

Science, Technology, Engineering and Math (STEM)

STEM fields – Science, Technology, Engineering and Math – launch a ton of today's best innovations, problem-solving ideas, and high demand careers. What problems do you want to solve?
